

☀️ **Be One of the First 50 Teachers to Join the Scatter Pilot Program!**

We're looking for 50 innovative educators to join the exclusive Scatter Pilot Program — a small, hands-on community of teachers testing The Scatter Method, a new approach to lesson planning built by teachers, for teachers.

💡 **What Is The Scatter Method?**

In a world where students are obsessed with short-form content, it is harder than ever to keep their attention in the classroom. The Scatter Method is here to help. This partially classroom-tested framework reconnects educators to creativity, autonomy, and engagement — without adding extra hours to your day. The Scatter Method allows lesson planning to be more dynamic, improve student focus and engagement, and allow you to rediscover the spark that made you love teaching in the first place.

🕒 **How Can You Join the Pilot Program?**

1. Purchase the [Scatter Guide](#) (\$26.50) and explore the method.
2. Implement a Scatter Method lesson (any subject) within 4 weeks of your purchase.
3. Email proof of lesson implementation (lesson plan, student artifact, video of lesson, etc) and a one-page reflection of your experience doing a Scatter Method lesson (this reflection—the good, the bad, and the ugly—gives us feedback to help improve the Scatter Method program).

📁 **Possible Benefits**

After Scatterbrain LLC receives your email of lesson implementation and feedback, you will receive:

1. Certificate of completion: Official Scatter Method Pilot Educator.
2. \$10 thank-you gift card to TPT or Amazon.
3. Invitation to join the Scatter Affiliate Program (a program where you secure sales of the Scatter Method guide, and receive 30% commission based on your monthly sales).

🧩 **Who We're Looking For:**

We want creative, reflective teachers who are passionate about improving engagement and autonomy in the classroom, are open to testing new approaches and giving honest feedback, and teach in any K–8 settings (any subject welcome).

🧠 **Need More Information?**
